Copier Candidate

copier.candidate@example.com | (555) 222-3333 | New York, NY

PROFESSIONAL OBJECTIVE

We are seeking an enthusiastic Full-Stack AI Engineer to design and implement agentic workflows, LLM orchestration pipelines, and recruitment automation tools.

CORE QUALIFICATIONS & COMPETENCIES

Proficiency in JavaScript/TypeScript, Node.js, and Express (ES modules).
Strong hands-on experience with React, Vite, state management, and modern CSS.
Experience with MongoDB/Mongoose or PostgreSQL database design.
Practical experience integrating LLM APIs using structured output / JSON mode.
Familiarity with runtime schema validation libraries (Zod).
Experience building RAG applications with embeddings and vector databases.
Familiarity with workflow orchestration frameworks (LangGraph or custom state machines).
Experience with Docker, automated testing (Vitest, Jest) and Python scripting.

WORK EXPERIENCE

Tech Copier LLC - Web Assistant (2022 - Present)

- Assisted team in reading technical requirements and copying specifications.
