# Alex Rivera

alex.rivera.architect@example.com | (555) 888-9999 | Austin, TX | github.com/alexrivera-cloud

## PROFESSIONAL SUMMARY

Principal Cloud & Systems Architect with 9 years of production expertise building resilient microservices and distributed data platforms. Proven leadership architecting containerized services with Kubernetes, Docker, and Terraform on AWS. Deep practical mastery of Node.js, React, Express, MongoDB, PostgreSQL, and Vitest.

## EXPERIENCE

### Apex Cloud Infrastructure - Principal Cloud Architect (2021 - Present)

- Architected Kubernetes clusters across AWS EKS managing 140+ microservices in production with 99.99% availability.
- Standardized Terraform infrastructure as code templates automating VPC, IAM, and S3 provisioning.
- Built event-driven backend services with Node.js and Express processing 12M events daily.
- Tuned high-concurrency MongoDB clusters and partitioned PostgreSQL databases, cutting query p99 latency by 58%.
- Led migration of administrative control plane to React 18 and Vite with comprehensive Vitest unit and integration suites.

### DataFlow Technologies - Senior Systems Engineer (2017 - 2021)

- Engineered multi-region Docker CI/CD pipelines in GitLab reducing build times from 45m to 7m.
- Deployed Redis caching clusters handling session state for 2M concurrent active users.

## TECHNICAL SKILLS

Cloud & Infra: AWS, Kubernetes, Docker, Terraform, Helm, CI/CD | Backend: Node.js, Express, REST, Microservices | Frontend: React, Vite, TypeScript, JavaScript | Databases: MongoDB, PostgreSQL, Redis | Quality: Vitest, Jest
