Sarah Chen

San Francisco, CA | sarah.chen.dev@example.com | (555) 234-5678 | github.com/sarahchen-dev

PROFESSIONAL SUMMARY

Versatile Full-Stack AI Software Engineer with 2+ years of hands-on experience developing web applications using React, Node.js, Express, and MongoDB. Passionate about LLM agent workflows, structured JSON extraction with Zod, and building responsive recruiter tools. Experienced in vector search and RAG architectures.

EDUCATION

University of California, Berkeley — B.S. in Computer Science
Graduated: May 2023 | GPA: 3.82 / 4.0 | Dean's Honor List (4 semesters)

PROFESSIONAL EXPERIENCE

NovaTech Labs — Software Engineering Intern | Jun 2023 - Present

- Developed and maintained full-stack web applications using React 18, Vite, Node.js, and Express.
- Integrated Google Gemini and OpenAI APIs with strict Zod schema validation for structured data extraction.
- Designed and optimized MongoDB schemas with Mongoose, improving query execution time by 32%.
- Implemented rate limiting, CORS controls, and secure RESTful API endpoints handling 20,000+ daily requests.

Berkeley AI Student Lab — Undergraduate Researcher | Jan 2022 - May 2023

- Built prototype RAG pipelines utilizing embeddings, FAISS, and custom prompt evaluation rubrics.
- Wrote comprehensive unit and integration test suites using Vitest and Jest achieving 88% branch coverage.

KEY PROJECTS

TalentFlow AI — Multi-Agent Hiring Pipeline
Technologies: React, Node.js, Express, MongoDB, Google Gemini, Zod, Vitest

- Architected a 6-stage autonomous recruitment pipeline orchestrating resume parsing, skills analysis, and scoring.
- Built deterministic 0-100 rubric scoring engine grounded in resume textual evidence.
- Designed clean, responsive recruiter dashboard with real-time stage status, execution traces, and markdown report export.

DocuQuery RAG — Intelligent Knowledge Search
Technologies: Python, Node.js, React, Ollama, LangChain, ChromaDB

- Constructed conversational semantic search tool indexing 500+ technical PDF documents.
- Created streaming UI with Vite and WebSockets for low-latency question answering.

TECHNICAL SKILLS

• Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5/CSS3
• Frontend: React, Vite, React Router, Tailwind CSS, Responsive Design
• Backend: Node.js, Express, REST APIs, Multer, Rate Limiting, Helmet, WebSockets
• AI & LLM: Google Gemini API, OpenAI API, Ollama, Prompt Engineering, Structured JSON, Zod
• Databases & Tools: MongoDB, Mongoose, PostgreSQL, Git, Docker, Vitest, Postman
