ACADEMIC SUMMARY

Final-year Computer Science undergraduate student with strong foundation in data structures, algorithms, and full-stack web engineering. Creator of multiple hands-on open-source projects utilizing React, Node.js, Express, MongoDB, and RAG architectures with Ollama.

EDUCATION

Georgia Institute of Technology - B.S. in Computer Science (Expected May 2026)

Current GPA: 3.88 / 4.0 | Relevant Coursework: Data Structures & Algorithms, Database Systems, Web Development, Artificial Intelligence

FEATURED PROJECTS

OmniSearch RAG - Multimodal Knowledge Retrieval Engine

- Built conversational retrieval system indexing technical documentation using Node.js, Express, and ChromaDB vector store.
- Extracted text embeddings using Ollama local models and generated grounded answers without hallucinations.
- Developed responsive web interface in React and Vite with live query streaming.

DevTrack MERN - Developer Productivity Workspace

- Full-stack project tracking application using React, Express, and MongoDB with user authentication.
- Designed RESTful endpoints handling task assignment, status progression, and analytics.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Java, C++ | Web: React, Vite, Node.js, Express, HTML5, CSS | Databases: MongoDB, PostgreSQL | AI: Ollama, Vector Embeddings, RAG, Prompt Engineering | Tools: Git, Postman, Linux
